

Rotary Drum Filter

Key Features

**Efficient Water
Filtration**

**High
Durability**

**Customisable
Solutions**

Product Information

Rotary Drum Filter uses a rotating filtration drum to separate suspended particles from the water stream. This solution can be integrated into recirculating aquaculture systems, fish farms and other applications.

Specifications

Product Type	Rotary Drum Filter
Dimension	3200mm x 800mm x 1200mm
Filtration Mesh	600 µm
Capacity	10m³/h
